

# Pairing a New Bye Bye Standby Socket with a Bye Bye Standby Energy Saving Wall Switch

## 1. Activate learning mode on your Bye Bye Standby socket

To put your Bye Bye Standby Socket into learning mode press the off button to ensure your socket is turned off; then hold the off button until the blue LED button flashes once per second

## 2. Pairing the devices

Simply press and hold the Wall Mounted Switch. The LED on the Bye Bye Standby socket will flash for a second and then remain switched off. You can now use the Wall Mounted Switch to control your Bye Bye Standby Energy Saving socket.

## 3. Control more sockets

To control more Energy Saving sockets with the same Wall Switch, simply repeat steps 1 & 2 as described above.
